

Vivid Link Descriptions

There's no doubt about what's at the other end of each link on this "Help and How-To" page of ZDNet. (We scrolled down a bit for this screen shot; that's why the navigation, etc. is not visible.) Under "Getting Started," for example, the name of every link is precise and clear—no overly clever, obscure labels. And just to be sure, the editors have included a short list of examples of what's covered in each area.
